Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-9, the prior art fails to teach or suggest an apparatus for DBWRR (Delay Bound Weighted Round Robin) cell scheduling in an ATM (Asynchronous Transfer Mode) switch, comprising "an ATM processor for processing and transferring said ATM cell groups stored in each of said input buffers on the basis of the cell scheduling information in each of said ATM cell scheduling tables, a preset weight, a delay time required by an earliest cell in a first one of said ATM cell groups stored in each of said input buffers and an allowable delay time required by each of said input buffers," in combination with other limitations, as specified in the independent claim 1.

Regarding claims 10-19, the prior art fails to teach or suggest a method for DBWRR (Delay Bound Weighted Round Robin) cell scheduling in an ATM (Asynchronous Transfer Mode) switch, comprising the steps of "allowing said ATM processor to determine how to process cell transfer scheduling for said first cell group stored in said specific input buffer on the basis of said ATM cell scheduling information about said first cell group stored in said specific ATM cell scheduling table, said delay time required by said earliest cell in said first cell group and said allowable delay time required by said specific input buffer, and then process the cell transfer scheduling for said first cell group in accordance with the determination result," in combination with other limitations, as specified in the independent claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
